MSR Snowshoes

Built upon the rugged ExoTract™ deck, Revo Explore snowshoes bring an unrivaled level of comfort through new HyperLink™ bindings, making them perfect for those tackling all-day, all-mountain explorations. Delivering the same confidence-inspiring performance underfoot as our Ascent series, their cradle binding eliminates pressure points, while its fast two-strap ratchet system makes getting in and out for lunch stops a breeze, not to mention making on-the-fly adjustments. Add-on Modular Flotation tails keep you ready for any change in winter's mood.

Snowshoes should be put in a dry place after use and the shoes should be packed and stored with the sharp traction ends facing each other. This will reduce possibility of injury and keep the metal traction frames in good condition.
